

Broadcore Call Center

Data Sheet

Broadcore Call Center

Broadcore Call Center provides an integrated, full-featured solution with all the benefits of Unified Communications service advanced voice and multimedia applications. The solution provides a carrier-class platform, enabling businesses of any size to build a comprehensive, feature-rich call center anywhere in the world—so you can simply connect.

Virtual ACD and Virtual Call Center

This solution supports individual centers as well as distributed multi-site centers to act as a single virtual call center, regardless of geographic location.

Broadcore Call Center solution consists of two main offerings tailored specifically for small to medium sized businesses:

1. Cost Effective Offer – Virtual ACD (ACD/Queuing and a web agent for ACD state synchronization and daily reports)
2. Complete Offer – Virtual Call Center (Enhanced ACD/Queuing, call center clients and advanced real-time and historical reporting)

KEY FEATURES

Automatic Call Distributor (ACD)- Intelligent call routing and queuing.

Enhanced ACD- Advanced queuing when call center is not staffed and maximum wrap-up timer settings.

Auto Attendant- Interactive voice response (IVR) and custom messaging.

Agent and Supervisor Clients- Intuitive client interface for greater agent productivity and management oversight.

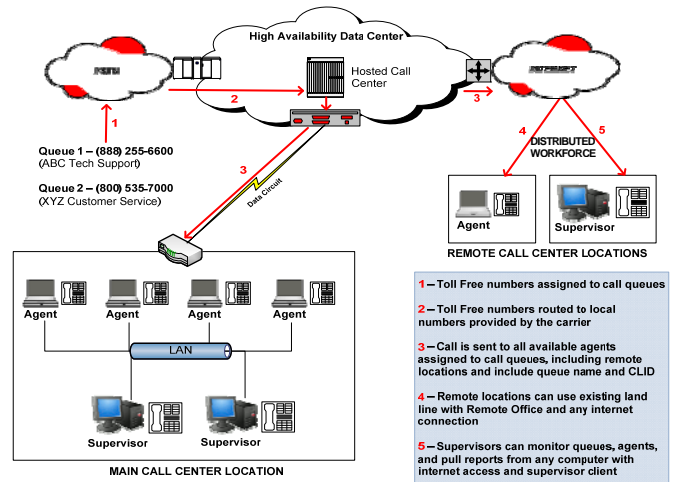

ACD State Synchronization through the web agent or IP phone interface.

Call Center Reporting- Preset real-time and historical reports in graphical and tabular form.

Music On Hold and Comfort Announcement- Callers are provided with a greeting, followed by music or advertisements and periodic comfort announcements in audio or video format.

Monitoring and Recording- Pre-integrated, third-party vendor solutions for real-time monitoring and recording of agent calls.

Unified Front-End Web Portal Provisioning- Single point of entry for provisioning all Broadcore services and client applications, including Call Center Supervisor.

Call Center

Call Center also supports traditional call center features:

- **Overflow-** Incoming calls can be forwarded to an overflow phone number when queue is overloaded.
- **Agent Log in/Log off-** Calls are only presented to agents who are on duty, and agents can log into several call centers.
- **Hoteling for Extension Mobility-** Agents can log in at any available workstation while maintaining unique user settings.
- **Service Integration-** Any personal service settings, such as Call Forwarding, Call Notification, Call Screening, and Voice Messaging, can be assigned to a call center agent to customize the call center group.
- **Localization-** Seven pre-bundled languages: English (U.S.) default, French (France), German (Germany), Italian (Italy), Spanish (Spain), Spanish (CALA), Central America and Latin America, Chinese Simplified (PRC), People's Republic of China. In addition to the seven languages, a custom language of choice is provided.

KEY BENEFITS

Improve Customer Service- Ensure all incoming calls are serviced efficiently under any network condition and at any time.

Create Virtual Call Centers- Establish call centers anywhere in the world, just with a broadband connection—without additional hardware, PC-resident software or traditional phone lines.

Offer 24x7x365, Follow-the-Sun Customer Care- Ubiquitous services with a single number for distributed work force and call center locations.

Manage Calls Effectively- Choose from a range of call distribution policies, including skills-based call distribution.

Minimize Costs- Provide the option for agents to work remotely with access to all call features— offering a smart way to increase staff without renting office space.

CALL CENTER SUPERVISOR CLIENT FEATURES

- Supervisor Queue Monitoring and Management**
- Agent Monitoring and Supervisor Barge In**
- Real Time and Historical Reports**
- Supervisor Dashboard**

- Agent Activity Report-** Agents can see real-time statistics directly
- Call Logs and Enhanced Call Logs-** can be assigned to Auto Attendant, Call Center and Hunt Groups
- Auto Dialer-** Via Outbound Click-to-Dial and Outlook Directory Integration
- Auto Screen Pop-Ups-** Incoming calls pop up on a Web interface showing information associated with the incoming call
- State Control Functions-** Login/Logout as an Agent, Ready, Not ready and Wrap Up
- Call Control Functions-** Auto Answer, Hold, Transfer, Conference & Escalation

Call Center Express Agent License

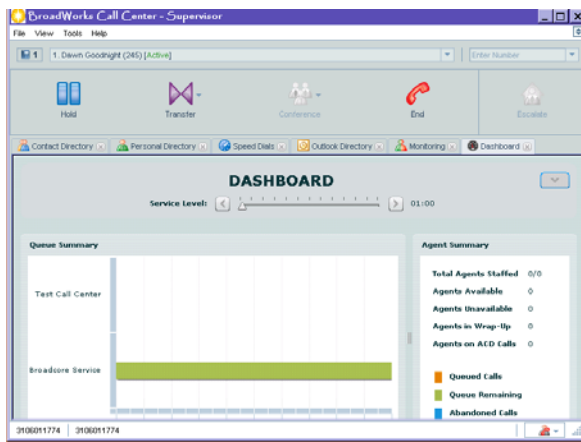

The Call Center Express Agent license allows call center agents to perform agent state control functions directly from their Polycom phones. This allows for more accurate reporting, management and call distribution.

Call Center Supervisor Client

With the Call Center Supervisor client application, supervisors gain superior management capabilities to monitor and record agent calls to determine training gaps and requirements. With the advanced reports available through Broadcore's Call Center Reporting solution, supervisors can determine appropriate staffing levels to manage costs while still effectively handling busy hours.

The Call Center main interface is generic for both client applications. Some of the functionality is available only to the supervisor.

Call Center Supervisor Client – Main Interface

Incoming Call Alert

Preset reports show agent activity, call duration, login/logout actions and agent call close times. Other reports, some of which are available to agents as well as supervisors, show caller activity, such as call abandonment rates and averages of time to answer, wait time and call duration.

Agent Activity Report

Summary

Broadcore Call Center delivers a comprehensive call center solution and provides innovative features that are not available in legacy systems.

Integrated with your Broadcore service, Broadcore Call Center expands reporting, eases management of agents and is very easy to implement.
